

MONTHLY TO-DO FOR JUNE

June 1, 2026

- **Plant:** Summer bedding plants such as lantana, marigolds, purslane and zinnia as well as most perennials.
- **Fertilize:** Late May to early June is the time to apply Texas Tee organic fertilizer to your lawn and landscape.
- **Transplant:** Edibles such as peppers, eggplant and okra. Direct seed black-eyed peas, cantaloupe and watermelon into the garden.
- **Apply:** Root stimulator to all new shrub and tree plantings each month and maintain a top-dressing of 3-4 inches of mulch to conserve moisture.
- **Irrigate:** Have your irrigation system audited to ensure proper water delivery before the heat of summer arrives.
- **Prepare:** For fall tomatoes! Plant tomato transplants early to mid-July for fall harvest (transplants arrive in mid-June).
